

I am writing about the possibility of LPFM stations taking priority over FM translators. I listen to Air 1, which uses FM translators and I feel it would be a great loss to many people if they lost their Air 1 signal because of these LPFM stations. Currently, I am a college student and move back and forth between AZ CA several times a year. In both areas I am able to listen to Air 1 which is something I really benefit from. I believe in the worth of Air 1 enough that I donate money monthly to help support them so that they can stay on the air. I know several people, in both California and Arizona who listen to and benefit from Air 1. It is a great radio station because it plays good music, Christian music, is free from commercials, and you will never hear curse words or any kind of foul language when listening to this station. I know non-Christians who listen to Air 1 because they feel better about the music played on Air 1 and it's effect on their children. Being a mother and knowing there is a radio station you can play in your car without worrying that your child will hear something you don't want them to, is very comforting. Air 1 is a great benefit to many people in many places across the US and should remain on the air today and always. Thank you for your attention and consideration.
